

## **Gianni Chianetta, GSC**

Gianni Chianetta is chairman of the Global Solar Council (GSC), the global non-profit association representing national, regional and international associations and companies in solar energy. Gianni is also vice president and head of International Affairs at ItaliaSolare, the Italian Solar Association; director of Greening the Islands, a global initiative for island sustainability; and managing director of the Green Consulting Group. He has been working in the energy field since 2002, with previous positions as managing director of BP Solar Italy and external affairs director at BP Italia. Gianni has a degree in Mechanical and Management Engineering from Middlesex University (London), a master's from the Kellogg School of Management (Chicago), and certifications from SDA Bocconi Milano (Milan) and Istituto de Empresa (Madrid).

## **Ben Backwell, GWEC**

Ben Backwell is CEO of the Global Wind Energy Council (GWEC), an international trade association for the wind power industry with members representing over 1500 companies, organisations and institutions in over 80 countries. Prior to joining GWEC, Ben was managing director at FTI Consulting, advising companies in the clean energy sector on strategy, communications and government affairs. Ben also worked as a journalist and analyst for 20 years, covering energy policy and markets around the world. He is the author of two books on the wind industry as well as reports and white papers on power markets and policy frameworks. He holds an MSc in Political Science from the Institute of Latin American Studies, University of London.

### **David Wortmann, Energy Watch Group**

David Wortmann is head of the board of the Energy Watch Group, where he focuses closely on the scientific, political and business components of the transition towards 100% renewable energy. David has worked in the field of renewable energy for over 20 years, with experience in policy, communication, strategy and business development across industry, government, and non-governmental organisations. He has also engaged with various stakeholder groups on the socio-economic benefits of the energy transition. Prior to joining the Energy Watch Group, David held positions such as head of the Energy and Environmental Technology department of Germany Trade and Invest, director for policy at the World Council for Renewable Energy, and vice president of public affairs, EU, for First Solar. Currently, he is also managing director of DWR eco.

### **Rabia Ferroukh, IRENA**

Rabia Ferroukhi is director of the Knowledge, Policy and Finance Centre at the International Renewable Energy Agency (IRENA). She has worked at IRENA since 2011 and brings over 20 years of experience in the fields of energy, development and environment. She previously headed IRENA's Policy Unit, working on a range of renewable energy policy and regulatory issues including market design, target setting, socio-economic benefits and integrated resource management. Earlier, Rabia worked in both the public and private sectors, including with governments in the Middle East and North Africa, energy companies in the Mediterranean and Gulf regions, and international institutions. Rabia holds an MSc in Applied Economics and a PhD in Economics from the American University in Washington, DC.

### **Monica Oliphant, Former president of ISES**

Monica Oliphant is former president of the International Solar Energy Society (ISES). She has worked in renewable energy for over 40 years in the areas of solar, wind and energy efficiency and has served on various government committees in South Australia. Monica was a research scientist at the state electric utility, SA Power Networks, where she spent 18 years improving energy efficiency, undertook South Australia's first large-scale wind survey and analysed the impact of solar water heating and PV on energy use. Monica is currently an adjunct associate professor at the University of South Australia and runs her own consultancy, Monica Oliphant Research Scientist.

### **Rana Adib, REN21**

Rana Adib is executive secretary of REN21, an international non-profit association and renewable energy multi-stakeholder network that connects a wide range of key actors. Rana was previously REN21's research co-ordinator, developing the global expert community and making the REN21 Renewables Global Status Report series an international reference in the renewable energy field. Prior to REN21, Rana worked for over 10 years in private industry and applied research in the areas of renewable energy, energy access and waste management. She was also responsible for co-ordinating the biogas-to-energy research programme at Veolia Environment. Rana holds a master's degree in Industrial Engineering from the University of Wedel in Germany.
